

Angel Molina

(346)-581-8742 | www.linkedin.com/in/angellms-tx | amolin25@cougarnet.uh.edu | <https://angelleoms.github.io/portfolio/>

OBJECTIVE

Supply Chain Management student combining hands-on fulfillment operations experience with data analytics to identify root-cause inefficiencies and improve logistics performance. Seeking an internship, co-op, or entry-level analyst role in operations or logistics.

EDUCATION

University of Houston, C. T. Bauer College of Business, Houston, Texas

Bachelor of Business Administration in Supply Chain Management

May 2027

Certifications: Power BI Essential Training, Databases and SQL for Data Science with Python (IBM)

Cumulative GPA: 3.64

Related Coursework: SCM Fundamentals, Logistics Management, Business Modeling and Analysis (Excel)

EMPLOYMENT HISTORY

Digital Personal Shopper (Order Fulfillment & Inventory Operations)

Walmart, Humble, Texas

July 2024 – Present

- Execute high volume order fulfillment, about 25–35 online orders per shift (800+ items daily) achieving 100+ items/hour while maintaining high accuracy and on-time pickup performance
- Serve as one of a select group of associates trained across the full fulfillment process, executing order picking, backroom staging, preparation, curbside dispensing and merchandise restocking while coordinating with team members to ensure efficient workflow, order accuracy, and timely delivery.
- Direct backroom operations and workflow coordination, stepping into leadership during Team Lead's absence, and training over 10 new associates so far on work procedures
- Contributed to reducing curbside pickup wait times by about 42% on the pickup curbside during demand periods and managing 20-30% workload increases in order volume during seasonal peaks (up to 40-100% increase during Black Friday/Cyber Week)

Crew Member

McDonald's, Kingwood, Texas

January 2022 – July 2022

- Operated in a high-volume environment (300+ daily transactions), processing \$1,000+ in cash and digital transactions per shift with full accuracy while meeting strict time, quality, and operational standards
- Applied FIFO inventory practices to manage stock rotation and reduce waste, ensuring product availability during peak demand periods

PORTFOLIO PROJECTS

Walmart Operations Analytics Project – Approved by Store Management

Summer 2026

- Designed and developed an Excel and Power BI analytics solution, using real Walmart operational data to investigate drivers of NIL picks, inventory availability issues, and fulfillment bottlenecks across store operations.
- Analyzed 919 NIL Picks, 13,250+ Out Scans, 90+ freight records, and 15 KPI observations collected over a 5-week period, identifying that 66% of NIL Picks originated from the Food/Consumables department.
- Evaluated freight execution, inventory accuracy, and fulfillment performance to develop recommendations after finding that 89% of inbound freight was concentrated across three departments and First Time Pick averaged 94.0%, below the performance target.

World Cup Logistics Project Using SQL (In progress)

Summer 2026

- Building a MySQL database from historical FIFA World Cup datasets to examine operational metrics including stadium capacity, attendance, match scheduling, and tournament logistics.
- Applying SQL to import, organize, and analyze relational data while developing queries to evaluate operational efficiency and event performance.

SKILLS

- Order Fulfillment Operations
- Inventory Management
- Data Analysis
- Excel, Power BI, SQL (MySQL)
- Languages: English, Spanish
