OBJECTIVE

Supply Chain Management student with experience in fulfillment operations, inventory management, and data analysis, seeking an internship or co-op to improve logistics efficiency and support data-driven decisions.

EDUCATION

University of Houston, C. T. Bauer College of Business, Houston, Texas

Bachelor of Business Administration in Supply Chain Management

May 2027

Industry Certifications: Power BI Essential Training, Databases and SQL for Data Science with Python (IBM)

Supply Chain Management GPA: 3.33 | Cumulative GPA: 3.47

EMPLOYMENT HISTORY

Digital Personal Shopper

Walmart, Humble, Texas

July 2024 – Present

- Execute high volume order fulfillment, about 25–35 online orders per shift (800+ items daily) achieving 100+ items/hour while maintaining high accuracy and on-time pickup performance
- Maintain real-time inventory accuracy across high-volume picking and returns operations, minimizing discrepancies and supporting reliable order fulfillment
- Directed backroom operations and workflow coordination, stepping into leadership during Team Lead's absence, and training over 10 new associates on standard operating procedures
- Contributed reducing wait times by 8% on the pickup curbside during demand periods
- Manage 20-30% workload increases in order volume during seasonal peaks (up to 40-70% surge during Black Friday/Cyber Week)
- Coordinated reverse logistics by evaluating returned items for restocking, improving inventory recovery and reducing shrink from non-sellable goods

Crew Member

McDonalds, Kingwood, Texas

January 2022 – July 2022

- Operate in a high-volume environment (300+ daily transactions), processing \$1,000+ in cash and digital transactions per shift with full accuracy while meeting strict time, quality, and operational standards
- Applied FIFO inventory practices to manage stock rotation and reduce waste, ensuring product availability during peak demand periods

RELATED COURSEWORK/ACADEMIC PROJECTS

SCM Fundamentals, Logistics Management, Business Modeling and Analysis (Excel)

Sherry SD Energy Project

Spring 2026

- Evaluated petroleum-free alternatives to plastic bags by analyzing supply chain feasibility, lifecycle costs, and trade-offs across plastic, paper, and reusable materials to support data-driven recommendations
- Analyzed consumer data (118 responses) using Excel, identifying key behavioral insights including 70% low reusable adoption and \$0.05 price trigger for behavior change
- Identified a 57% intention-action gap of people that are concerned about the environment, 31% do use reusable bags and 48% experience forgetfulness as a key operational barrier

3M Canada Case Project

Spring 2026

- Analyzed 3M Canada's healthcare supply chain by comparing VAR vs. direct-to-hospital distribution, evaluating cost drivers across fulfillment, transportation, inventory, and customer service using case data
- Quantified key cost trade-offs; 10× increase in picking costs, 25% higher inventory, ~\$550K additional customer service costs under direct distribution and recommended maintaining the current system which uses VARs and implement it with a selective hybrid approach

SKILLS

- Order Fulfillment
- Inventory Management
- Excel, Power BI, SQL
- Languages: English, Spanish
